

SB0581 and SB0582: UNFAVORABLE and UNFAVORABLE

Communist much? SB0581 states, in-part, “‘Value-Based Purchasing’ means financially incentivizing providers to meet specified outcome measures.” Nothing like government “incentives” to produce an outcome for which government has zero authority for involvement. Leave health care to doctors and their patients. The People don’t need the same harmful government involvement (at any level) in medical affairs as has been demonstrated in the past few years. Thanks.

SB0582 goes on to state, “‘Behavioral Health’ includes substance-related disorders, addictive disorders, mental disorders, life stressors and crises, and stress-related physical symptoms.” Would this include the mental anguish suffered by say, gender detransitioners, who must suffer for the rest of their lives due falling for an agenda pushed by certain politicians as depicted in the following article? <https://nypost.com/2022/06/18/detransitioned-teens-explain-why-they-regret-changing-genders/>

Once again, government has no business meddling in health care. In-short: butt out.
