

**Favorable with Amendments – HB0130 Election Law – Foreign  
Manufacture of Election Systems – Notification and Termination of  
Contract**

I'm totally in favor of this bill as I believe foreign manufactures have a major impact in our current elections systems degrading the integrity of the whole system and creating doubt in the election system.

Since I do not know the term of the current contracts being used in our current systems, I think this legislation should also apply to existing contracts and the same ramifications should be applied to those existing contracts.

I'm in favor of this bill and strongly urge the legislators to also consider my testimony, make the recommended changes and support this bill.

Thank you.
