

**To: House Ways and Means Committee**

**Subject: HB0035**

**Date January 27, 2023**

Voting is a sacred right for Maryland voters.

It more important that only legal voters vote than it is to require personal identification at liquor stores, airports, banking, schools, health care facilities, drive a car, etc.

If personal or voter id is not required for voting, then the legislature is saying that voting is not as important as all of the other activities people engage in that does require identification and is making voting the least important of our activities.

Therefore, I completely support HB0035.
