

SB0129 is an 'emergency bill'? Why?

This is a bill no one in reality should support. It does not have a fiscal impact report and it does not have any sort of policy review. This should not be shoved through, the infrastructure is not in place to implement it. More reasons not to trust the BOE system and all of it's 'third party' vendors. The more complicated you make the process, the less secure it is, again in reality.

NO please to SB0129
