

Maryland
Hospital Association

Senate Bill 1087 - Maryland Artificial Intelligence Advisory and Oversight Commission

Position: *Support with Amendments*

February 22, 2024

Senate Education, Energy and the Environment Committee

MHA Position

On behalf of the Maryland Hospital Association's (MHA) member hospitals and health systems, we appreciate the opportunity to support and propose amendments to Senate Bill 1087.

As technology rapidly advances beyond the scope of our existing regulatory and statutory framework, any efforts to govern innovations like artificial intelligence (AI) and/or other digital algorithmic processes must balance flexibility, innovation, and accountability. Health care technology for clinical decision-making, service delivery, and patient records has advanced significantly in the last decade alone. All our member hospitals use a form of electronic medical record, health information exchange network, and/or claims clearinghouse to perform day-to-day operations. Some of the vendors behind these applications are starting to integrate AI into their offerings, and others are expected to follow suit.

Hospitals and health care providers must be included from the beginning in any discussions on governing AI to ensure we can provide a digitally optimized health care experience. We recognize that although AI and other algorithmic innovations offer significant potential to boost hospital efficiency and outcomes, it also has the potential to exacerbate biases and crystallize outdated standards. We welcome the opportunity to work with industry experts through this Committee to stay informed and engaged on emerging issues in AI and AI regulation. We offer the following amendment to SB 1087:

On page 2, in line 2, strike "AND"; and in line 4, after "BOARD" insert:

"(5) A MEMBER REPRESENTING HOSPITALS, APPOINTED BY THE GOVERNOR".

For these reasons, we request a *favorable* report on SB 1087 and MHA's proposed amendment.
