Good Afternoon chairman and
members of the committee,

My name is mia and I'm in fourth th
Grade. And I'm here to tell you
that I think SB980 is good
because it ~~makes~~ all about making
science fun for kids like me in
public schools. I like playing games
on computers, coding, and I think
learning about it would awesome to
learn more about it! SB980 says
that school will help more kids like
me join computer science classes
and that's great because
every one should have a chance
to learn and have fun.

I also like that SB980 wants
schools to teach computer science
to younger kids like me in
elementary and middle school.

That's amazing because it means
we can start learning early and
maybe even become super smart
when we grow up. So I hope
you really, really support SB980
because it's about making
sure all kids get to have fun
learning about computers. Thanks for

helping us learn cool stuff... Best wishes

Mia
