Senate Bill 472

State Government - Permits, Licenses, and Certificates - Processing
(Transparent Government Act of 2024)

Date: February 22, 2024

To: Education, Energy & The Environment Committee

Position: **Favorable**

From: Matt Stegman
Maryland Staff Attorney

Chesapeake Bay Foundation (CBF) **SUPPORTS** SB 472, The Transparent Government Act of 2024. The legislation directs most departments of State government to create an inventory of and report to the Governor information about the various permitting programs the department administers, including recommendations on how to improve the efficiency of the permitting process. The bill further creates a standing Government Efficiency Commission to report annually on how to make Maryland's permitting processes more transparent and efficient.

CBF knows first hand how challenging it can be for some members of regulated communities to navigate Maryland's permitting processes. For example, CBF works with many individual and small farms to complete their required nutrient management plans and has helped communities navigate the permitting process to install living shoreline projects. A transparent and user-friendly permitting process can also aid in rigorous enforcement. When agencies have to spend less of their regulatory capacity correcting honest mistakes they have more bandwidth to investigate serious violations.

For the reasons stated above, **CBF urges the Committee's FAVORABLE report on SB 472.**
