

Honorable members of the Environment and Transportation committee,
My name is Suzanne Price, and I reside in Anne Arunde Co, Maryland. I am writing to express my strong support for House Bill 885, particularly with the proposed amendments.
The amendments that I advocate for include provisions ensuring that countries listed under ITAR with both partial and full embargoes are prohibited from purchasing public agricultural land and participating in agricultural programs in Maryland. I believe these amendments are crucial for safeguarding our national and food security.

By implementing these measures, we can better protect our agricultural resources from potential threats associated with countries subject to ITAR restrictions. This not only enhances our national security but also ensures the resilience of our food supply chain. I urge you to consider and support these amendments to House Bill 885 for the greater well-being of our state and country.

Thank you for your attention to this matter. Please support HB0885

Sincerely,
Suzanne Price
