

Committee: Environment and Transportation
Testimony on: HB0735 - Maryland Beverage Container Recycling Refund and Litter Reduction Program
Organization: Maryland Legislative Coalition Climate Justice Wing
Submitting: Laurie McGilvray, Co-Chair
Position: Favorable
Hearing Date: February 28, 2024

Dear Chair and Committee Members:

Thank you for allowing our testimony today in support of HB0735. The Maryland Legislative Coalition (MLC) Climate Justice Wing, a statewide coalition of nearly 30 grassroots and professional organizations, urges you to vote favorably on HB0735.

The Beverage Container Recycling Refund and Litter Reduction aka the “MD bottle bill” is a very sensible bill. It is an easy, low-hanging fruit solution to reduce plastic pollution and greenhouse gas emissions by reducing the energy needed to produce new beverage containers.

Beverage container deposit programs are a proven, highly effective policy for recovering used beverage containers and reducing litter. This bill would create a beverage container deposit program in Maryland with a 10- or 15-cent refundable deposit, depending on the size of the container. The deposit is refunded to the customer when the bottle is returned and is estimated to achieve a 90% return rate.

This program would be self-funded from fees paid by producers, revenue from the sale of raw materials, unclaimed deposits, and penalties. So while the state and local counties are grappling with extremely tight budgets, the program established by the bill would not cost the state at all and relieve the counties and ultimately the taxpayers from the burden of expensive waste/recycling costs.

This bill would provide a high rate of return for containers by creating incentives for the development of refillable and reusable containers. It isn't cost effective to produce reusable containers if they are not being returned as part of a circular and zero waste economy. We also note recycling refund programs for beverage containers go hand in hand with legislation passed last year initiating the process to adopt producer responsibility for packaging. It is estimated that 40 to 60 percent of packaging is beverage containers according to the National Stewardship Action Council. Producer responsibility programs help us reduce our volume of waste. Recycling refund programs help us reuse and recycle a major portion of the packaging waste stream.

The state of Maryland needs to protect our waterways and our beloved Chesapeake Bay from plastic and litter pollution and this bill will accomplish this goal. The MLC Climate Justice Wing strongly supports HB0735 and urges a FAVORABLE report in Committee.
