

Testimony of the RV Industry Association before the House Committee on Environment and Transportation on HB 605

Chair Korman, Vice-Chair Boyce, and members of the Committee, I am Sophia de la Torre, the Senior Manager of Government Affairs for the RV Industry Association. I thank you for the opportunity to appear before you today on its behalf in support of HB 605, the bipartisan and bicameral legislation to govern the relationship between manufacturers and dealers of recreation vehicles (“RVs”).

The RV Industry Association is the national trade association which represents RV manufacturers and their component parts suppliers, who together build more than 98 percent of all RVs produced in the U.S. The Association is the unifying force for promoting safety and professionalism within the RV industry; and works with federal and state policymakers, as well as recognized national standards-setting bodies, to promote and protect the RV industry. Our members build RVs, such as motorhomes, truck campers, travel trailers, fifth-wheel trailers, folding camping trailers, and park model RVs.

According to an economic impact study done in 2022 by John Dunham and Associates, the total economic output of the RV industry in Maryland was \$937 million.

- Manufacturers and suppliers = \$154 million
- Sales and service = \$240 million
- Campgrounds and travel = \$543 million

There were approximately 150 RV-industry related businesses in the state in that time frame that paid nearly \$327 million in wages and were responsible for more than 5,000 jobs in Maryland. Total taxes paid by the RV industry were \$102 million.

The RV industry operates on a one-dealer-to-many manufacturers model with no true franchise relationship between parties in a manufacturer-dealer agreement, while the auto industry is one dealer to one manufacturer and is based on a true franchise model. However, we have a patchwork of laws across the country that create confusion on which part of what provision applies to which industry, and under what circumstances.

To fix this problem, and to address other structural problems in the law, the RV Industry Association is asking this Committee to support HB 605, to place the manufacturer-dealer relationship for RVs in a separate chapter of law. This legislation is the product of negotiation between the RV Industry Association and RV dealers in Maryland, both of whom strongly support its approval. Passage of this legislation will strengthen the viability of the RV industry in Maryland to the state’s benefit and that of consumers, manufacturers, and dealers alike. This legislation was approved nearly unanimously on a 124-10 vote by the House last year as House Bill 1173 and passed by the Senate with a minor amendment; unfortunately, the General Assembly adjourned *sine die* before the House could concur with the amended bill.

Consumers will benefit from the better relationship between RV manufacturers and dealers since the legislation will improve cooperation between the two on warranty matters, pre-delivery inspection, and other issues. Consumers will also benefit from a more stable environment, knowing that the dealer who sold them an RV will continue carrying those brands.

This bill would place the RV industry in a separate chapter from the auto industry, finally allowing these two industries to operate separately under law as they already do in reality.

HB 605 is designed to be fair, reciprocal, and reasonable to all stakeholders – and in the RV industry, that includes not only the dealer and the manufacturer, but also suppliers to manufacturers who provide a written warranty on their products directly to those who purchase and enjoy RVs. These suppliers must also treat dealers fairly under HB 605 in warranty matters – a major difference from the automobile industry.

HB 605 - An RV Specific manufacturer-dealer agreement law:

- Accommodates the RV industry's unique "one-dealer-with-many-manufacturers" business model that is not based on a franchise structure; and
- Works best for the RV industry and the state – the RV industry will not be out of compliance with any inapplicable automobile franchise provisions the law might contain.

Key Points for State Legislators

- An RV Specific Model law, on which HB 605 is based, has been enacted in 18 States with no negative repercussions, including the neighboring states of Pennsylvania, Delaware and Virginia. Similar legislation was also introduced earlier this year, in Washington and Ohio, and last year in New York and Wisconsin.
- RV specific laws slightly different from the Model Law are enacted in another five States.
- Both RV manufacturers and RV dealers in the state are asking for this legislation and have agreed on the language to be included.
- The bill includes industry-approved definitions for all RV types for clarity.

Key Provisions for RV Dealers

- Warranty obligations would include original equipment manufacturers (OEMs) and suppliers of component parts and assemblies.
- Dealer-initiated termination of a manufacturer/dealer agreement – a common RV industry practice not often seen in the auto industry – is authorized by the bill.
- Multi-state dealers, like manufacturers, will benefit from consistent manufacturer-dealer laws across the states.

Key Provisions for RV Manufacturers and Suppliers

- Consistent laws around the country simplify business operations.
- A fair, reciprocal, reasonable law means dealer and manufacturer are treated equitably.
- Placing the RV industry in a separate chapter will avoid future conflict with auto franchise laws.

We urge all members of this Committee to vote "Yes" on this important legislation and advance HB 605 to the full House.
