

Favorable with Amendment SB 431

Difficult long term conditions, such as Long COVID, undoubtedly cause significant physical, emotional, and financial stress on those suffering.

There is some research that indicates that rare cases of COVID vaccine injury manifest and cause similar burdens as cases of Long COVID. Both may be related to spike protein toxicity present in both conditions.

Please amend the bill to allow the same benefits to the essential workers who suffered COVID vaccine injuries.

Sincerely,
Mark Meyerovich
