The Honorable Joseline A. Pena-Melnyk  
House Health & Government Operations Committee  
House Office Building – Room 241  
Annapolis, MD 21401

RE: Support – Senate Bill 1071: Hospitals - Opioid Overdose - Medication-Assisted Treatment

Dear Chair Pena-Melnyk and Honorable Members of the Committee:

The Maryland Psychiatric Society (MPS) and the Washington Psychiatric Society (WPS) are state medical organizations whose physician members specialize in diagnosing, treating, and preventing mental illnesses, including substance use disorders. Formed more than sixty-five years ago to support the needs of psychiatrists and their patients, both organizations work to ensure available, accessible, and comprehensive quality mental health resources for all Maryland citizens; and strive through public education to dispel the stigma and discrimination of those suffering from a mental illness. As the district branches of the American Psychiatric Association covering the state of Maryland, MPS and WPS represent over 1000 psychiatrists and physicians currently in psychiatric training.

MPS/WPS support Senate Bill 1071: Hospitals - Opioid Overdose - Medication-Assisted Treatment (SB 1071) as amended. The Maryland Office of Overdose Response reports that 2,513 fatal overdoses occurred in Maryland from October 2022 to September 2023. In the previous twelve months to that, 2,549 fatal overdoses occurred in Maryland. Opioids were by far and away the primary driver of said overdoses. Also worth noting is that in the twelve months ending in September 2023, compared to the twelve months ending in September 2022, there were 1.2% fewer emergency medical services (EMS) naloxone administrations in Maryland, decreasing from 9,018 to 8,909. However, in the twelve months ending in September 2023, compared to the twelve months ending in September 2022, there were 6.5% more non-fatal, opioid-related hospital emergency department visits, increasing from 8,864 to 9,437.

The numbers are clear, opioid overdoses continue to be a significant public health concern for Maryland, with thousands of deaths still occurring each year. SB 1071 adds steps in the emergency treatment of opioid overdose to help prevent future overdoses, including outpatient treatment referrals that would get patients on suboxone or other medication-assisted treatment rather than being sent back out on the street to simply overdose again.

Therefore, for all the reasons above, MPS/WPS ask the committee for a favorable report on SB 1071 as amended. If you have any questions regarding this testimony, please feel free to contact Thomas Tompsett Jr. at [tommy.tompsett@mdlobbyist.com](mailto:tommy.tompsett@mdlobbyist.com).

Respectfully submitted,  
The Maryland Psychiatric Society and the Washington Psychiatric Society  
Legislative Action Committee
