

SB0059 does not contain vaccine potential injury information but continues the **FALSE narrative** of “safe and effective” which a larger majority of us now know as “The Big Lie”. Parents, especially new parents need to know of the dangers of vaccines in newborn babies with a larger focus on baby boys.

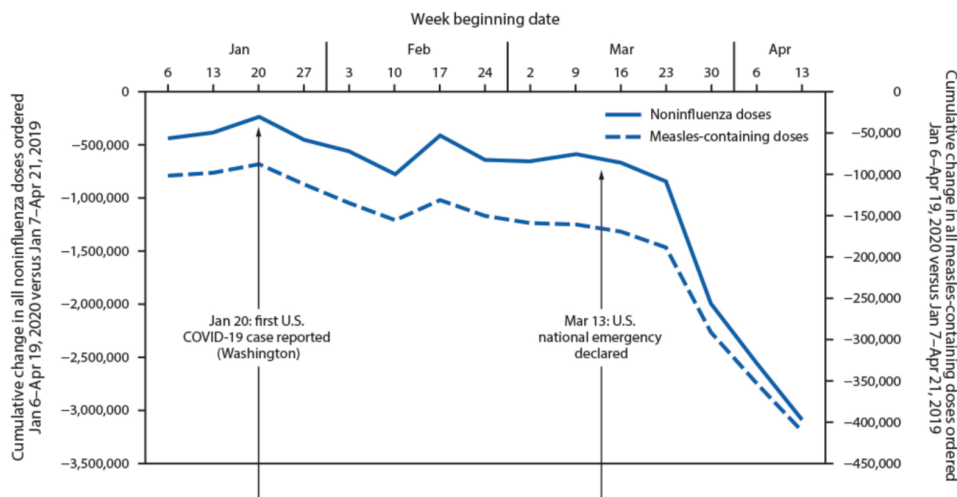

Depending on who you ask or who you listen to, **SIDS rates dropped significantly’ during the plandemic**. Less babies died. The best scenario is because mom’s didn’t take their babies and children to the doctors, so MANY doctors were afraid of treating the sick and many of us didn’t want a false sense or reality with a Zoom medical appointment, so we just didn’t bother going to dr apts. Some of us will now never go to a doctor again after the plandemic. While we were blessed to have more babies survive, a new phenomena began: **SADS -Sudden Adult Death Syndrome**, also VAIDS -Vaccine Acquired Immune Deficiency, it’s true and if curiosity gets to you can too will understand the bigger picture if you begin to research for yourselves.

More REAL science and data needs to be presented to parents, it’s called Informed Consent, and not the **Sciencism** that has become the norm with a nod and no thanks for Fouchi. **SAY NO to this bad and dangerous bill that doesn’t help anyone except for BIG PHARMA** who have immunity to all responsibility for deaths and vax injuries ([SEE VAERS](#))..

I pray you take heed in stopping this dangerous bill that will cause more harm, death and suffering.

Suzanne Price
AACo, Maryland

FIGURE. Weekly changes in Vaccines for Children Program (VFC) provider orders* and Vaccine Safety Datalink (VSD) doses administered[†] for routine pediatric vaccines — United States, January 6–April 19, 2020
