

Vote NO on SB 0018

This Bill puts all Pharmacy customers at risk. I went to the local CVS last week to pick up a prescription. The pharmacy was on lunch break. By the time they opened up there were seven people standing in line to pick up prescriptions. Situation was fairly chaotic and the pharmacy staff was trying to keep up with people in line to get prescriptions. Pharmacists should not have the added responsibility of vaccinating children. This should be the exclusive responsibility of the pediatricians.

This is a bad bill and should be stopped.
