

Please support HB0041. In a time of great lawlessness supporting laws that protect us by punishing violent criminals, especially REPEAT offenders if of paramount importance.

A beautiful young college nursing student, Laken Riley, age 22, was murdered in cold blood. Her amazing life is over, her family will grieve until their last breath on this earth. MAYBE just maybe if there were tougher sentencing for murderous criminals, even their own miserable criminal ones, they'd think twice before taking the life of another. WE ARE LIVING in a lawless society in decline.

PASS laws that have the ability to save innocent lives like HB0041. Do the crime, do the time.
