

It is a shock that we need an actual piece of legislation that says I am in charge of my kids - their upbringing, health decisions, and general welfare.

If you don't allow parents their fundamental rights to direct their children's lives you are violating general American Principles and Natural Law. Who is better to care for, educate, and direct our children than we parents? No one loves my kid more than I do - teachers, doctors and daycare providers like my kids and hope they have good and healthy lives but ONLY PARENTS have the moral obligation to attend to their physical, emotional, and education well being.

Pass this NOW

Do not let it lapse or be overturned EVER
