

SB0840 OPPOSE

Dear Committee Members:

I am strongly opposed to this bill.

This bill is setting up infrastructure for 15 minute cities, which is one of the steps to take away our rights as free citizens through government surveillance.

And then there is the potential hacking of the oh-so-secure database “owned or operated by the MD Coordination and Analysis Center”. Wouldn’t that be a treasure trove of information someone would love to have.

There is too much potential for overreach and abuse, especially now with facial recognition and AI.

Bring back the police you took away, give them back the ability to do their jobs and stop taking away our privacy and freedom.

Look around. Aren't we becoming a Surveillance State? Please oppose this bill and stop the dark cloud of surveillance state infrastructure being blanketed upon us.
