## DANGER ASSESSMENT

Jacquelyn C. Campbell, PhD, RN

Copyright 2003; update 2019; [www.dangerassessment.com](http://www.dangerassessment.com)

Several risk factors have been associated with increased risk of homicides (murders) of women and men in violent relationships. We cannot predict what will happen in your case, but we would like you to be aware of the danger of homicide in situations of abuse and for you to see how many of the risk factors apply to your situation.

Using the calendar, please mark the approximate dates during the past year when you were abused by your partner or ex partner. Write on that date how bad the incident was according to the following scale:

1. Slapping, pushing; no injuries and/or lasting pain
2. Punching, kicking; bruises, cuts, and/or continuing pain
3. "Beating up"; severe contusions, burns, broken bones
4. Threat to use weapon; head injury, internal injury, permanent injury, miscarriage, choking
5. Use of weapon; wounds from weapon

(If any of the descriptions for the higher number apply, use the higher number.)

Mark Yes or No for each of the following.

("He" refers to your husband, partner, ex-husband, ex-partner, or whoever is currently physically hurting you.)

1. ☐ Has the physical violence increased in severity or frequency over the past year?
2. ☐ Does he own a gun?

**Total "Yes" Answers:**

Thank you. Please talk to your nurse, advocate or counselor about what the Danger Assessment means in terms of your situation.
