

To Whom This May Concern,

**I do not agree, and I cannot support the passing of this bill** due to its negative impact on our local businesses, including my two small businesses and affiliated organizations.

I am the owner of Rein Remedy, a business that provides healthcare services on farms to children and adults with complex medical conditions. I have established contracts partnering with Rose of Sharon Equestrian School, Promise Landing Farm, and Starboard Stables.

Liability waivers have allowed us to educate our clients on the risks of the services we offer, waivers also allow us affordable rates for liability insurance coverage and have been a long standing requirement of our insurance companies. If liability waivers become unusable at these farms and recreational facilities, our clients would not be able to afford an increase in fees when insurance rates increase, which would result in the closure of many businesses like mine.

Regards,

Jessica J. Rilee, OTD, OTR/L
