

Please vote against this bill. I assume that it is well intentioned, but even a cursory analysis shows that most venues or activities that have the least possibility of injury would see their liability insurance sky rocket and many would be forced to close.

Participants in such activities are required to agree to the waiver and, if they do not agree, they do not have to participate. These waivers are voluntary contracts. This bill would be another instance of the government meddling in private activities, so please vote AGAINST SB 452.

Thank you.
