

HB 202 Absentee Ballots – Signature Requirements and Verifications

There must be signature verification for voting. The really is no reason why signatures are not verified in the computer age we live in. Signatures are attached to driver's licenses and if no signature is present in the voting record than the driver's license signature should be used.

The voting requirement in Maryland states that signatures will be verified but the Board of Election is NOT verifying any signatures.

Did you get your absentee ballot request ? Do you see the line for signature verification; well they do NOT verify any signatures. One major point is if you say you are going to do something than do it.

My question to each and every one of you do you think your vote counts and is worth verification to make sure your vote is NOT stolen ?

I ask that you vote in favor of House Bill 202
