

Testimony For SB0372

Please vote for SB0372.

I believe allowing a candidate to run for Governor in the primary without naming a Lieutenant Governor (LG) makes sense. It would be similar to the Presidential elections where the candidates run without a Vice President until after being nominated at the party convention.

By waiting until after winning the primary, the governor candidate should have more perspective candidates to choose as a LG because those currently in office may decide to risk their current position to become a LG candidate based on their perceived chance of winning.

Before the primary, they may not want to risk their current position to become a LG candidate.
