Tele- mental Health has been very helpful for my daughter & myself! My child doesn't have to miss any appointments, because my busy work schedule as a single parent as well as dealing with rush hour traffic.

So allowing students to engage in therapy sessions on school grounds is a significant step towards ensuring mental health resources are readily available to those who need it. I believe that every child should have the opportunity to access mental health support without facing unnecessary limitations. Children having access to mental health services will be beneficial for the students and staff. It gives the students a safe place to go to!
