

HB0248 OPPOSE/WITHDRAW

Property Tax – Assessment Appeal Boards and Supervisors – Regional Organization

Dear Committee Members:

This bill is a direct assault on representative government.

The power to tax property needs to be able to be addressed directly by the people being taxed at the ballot box.

New regionalized sub-government authorities reduce direct accountability for the impact of taxation on “We the People.”

This is an end around our constitutional protections. It is clearly a legislative propagation of UN Agenda 2030.

The bill effectively erases jurisdictional boundaries, and city, county, and state sovereignty. This “Regionalization” is facilitating the development of **non-representative** government.

Collectivist/socialist methods of control, where we are governed by unelected boards and commissions are intolerable.

This approach to governance is straight out of UN Agenda 2030 and the Klaus Schwab’s World Economic Forum.

Legislative attempts to develop a Neo-Feudal state are unacceptable. Property owners and taxpayers DO NOT want to be turned into serfs on their own land by bureaucratic tyrants.

Withdraw this bill!

Best regards,
