

To the House,

I am Ashley Reed, the owner of Face It Spa & Wellness, a small business located in Severna Park Maryland. I received information from our Chamber of Commerce about the House Bill 1515. This bill would have a huge devastating impact on not only my business but as well as our entire community as our economy cannot handle increased costs. I am not speaking as just a small business owner but as a single mother and a Maryland resident. I am fighting for my employees and clients, and I am fighting for the honest truth that we all need to find a way to keep our money in our pocket and not have the government take it from us. This bill will not help us and will only benefit politicians and illegals for the political agenda. Do you want our entire paychecks? Do you want us on welfare? When we all end up homeless, will that money go back to us just like it went to illegals or in your pockets? Will you give me a job then? What do you see in the future?
