

HB0248 OPPOSE/WITHDRAW

Property Tax – Assessment Appeal Boards and Supervisors – Regional Organization

Dear Committee Members:

Reading this bill, it sounds like this is a mechanism for setting up an infrastructure for tax collection by a new regionalized sub-government. The bill also explains how we are to create this new sub-government. I was very alarmed reading it and I can't imagine this is legal or constitutional. Clearly UNAgenda21 is not a conspiracy theory because here it is, in black and white.

I presume this regionalization is associated with the Regions of, for instance, Sustainable Development Plan2040 (2040 Comprehensive Plan) in my county. This plan and others, being implemented all over the country in hundreds of counties, are in effect erasing jurisdictional boundaries, and city, county and state sovereignty – where we vote, where we have our representative government. This so-called “Regionalization” seen in the 2040 Comprehensive Plan is actually a transition to a non-representative government, a socialist control mechanism, where we will ultimately be governed by unelected boards and commissions. This is governance, as opposed to government BY the people.

This system of governance is straight out of UNAgenda21 (now Agenda2030) and the Klaus Schwab's World Economic Forum. <https://sustainabledevelopment.un.org/outcomedocuments/agenda21> As you can see here by their 17 goals <https://www.weforum.org/agenda/2023/12/science-sustainable-development-climate-goals/>, this is about ultimate control over every aspect of our lives. Please withdraw this bill!
