

Testimony Before the House Economic Matters Committee

In Support of House Bill 128 – The RENEW Act

By Vincent DeMarco, Maryland Citizens' Health Initiative

January 23, 2025

Mr. Chairman and Members of the House Economic Matters Committee, on behalf of the Maryland Citizens' Health Initiative, I am here to support, HB 128, the Responding to Emergency Needs from Extreme Weather (RENEW) Act. We commend Delegate David Fraser-Hidalgo for sponsoring this legislation. Thanks to the Affordable Care Act and to the leadership of the Maryland General Assembly, our state has made great strides in expanding health care coverage, reducing the percentage of our people without health insurance from 13% to 6% in the last few years. We have also worked hard to reduce unconscionable health disparities in our state, including by enacting the Health Equity Resource Communities Act of 2021. But, as Governor Wes Moore said in his Inaugural address, we must do all we can to expand coverage to the hundreds of thousands of our fellow Marylanders still without health care coverage and achieve health equity. We can only accomplish these goals with a new revenue source which would fund our goal of health equity for all Marylanders. Because HB 128 allocates a portion of the proceeds from this program to fund health care needs and to reduce climate and health disparities, we strongly urge you to pass this life saving measure. I am submitting this testimony on behalf of our individual organization, Maryland Citizens' Health Initiative, Inc., because we have not reviewed this legislation with our entire Maryland Health Care For All! Coalition.
