

HB1036

OPPOSE

**Public Utilities - Generating Stations - Generation and Siting (Renewable Energy Certainty Act)**

Dear Committee Members:

I am opposed to the taking of this valuable land and prime farming land/soil for use in solar projects. This is not what the people of Maryland want. I oppose this bill because the local and surrounding community have previously benefitted from using this land for agricultural and youth education purposes. If it is taken away, we will lose a very valuable resource in Anne Arundel County.
