HB 1427 — Maryland Zero Emission Electric Vehicle Infrastructure Council - Revisions
Position: Informational

March 25, 2025

The Honorable Brian J. Feldman
Chair, Education, Energy and the Environment Committee
Senate Office Building
Annapolis, MD 21401

Dear Chair Feldman and Members of the Committee:

On behalf of the EV Charging Task Force, a Maryland-based coalition of electric vehicle (EV) drivers, I wish to submit the attached "Maryland Fast Charger Survey" for your consideration in connection with House Bill 1427.

HB 1427 directs the Maryland Zero Emission Electric Vehicle Infrastructure Council (ZEEVIC) to evaluate and provide recommendations on improving the reliability of the state's EV charging stations. With respect to this goal, our group conducted a comprehensive statewide survey of the operability of DC fast charging infrastructure from December 23, 2024, to January 4, 2025.

Thirteen volunteer EV drivers visited 304 fast charger locations and evaluated over 1,000 individual charging ports. The enclosed "Maryland Fast Charger Survey" table details our findings, including the number of ports observed as non-functional ("down") at the time of our visits.

The table uses a color-coding system to highlight concerns:

- **Red** highlights locations where all charging ports were inoperable;
- **Yellow** indicates sites where some, but not all, ports were non-functional.

For added accessibility, an interactive version of the table is available online at [Interactive Survey Data](#), and an accompanying map of the surveyed locations can be viewed at [Maryland Fast Charger Map](#).

Our survey highlights the strengths and challenges of Maryland's fast charging network, offering a practical, user-driven perspective to support the rationale for the reliability study proposed in HB 1427.

We respectfully submit this data for your review as you shape policies to improve the reliability and oversight of EV charging infrastructure statewide.

We are deeply grateful to Delegate April Miller, a fellow EV driver and HB 1427's sponsor, for her leadership in advancing this effort.

Thank you for your consideration and for the Committee's ongoing commitment to strengthening Maryland's electric vehicle infrastructure.

Sincerely,

/s/ Lanny Hartmann

Lanny Hartmann
