

My name is Keshia Miller. I am a resident of Garrett county in Oakland, Maryland. I do not support Hydraulic Fracturing for any part of Maryland, especially Western MD.

Western Maryland is known for the beautiful outdoors and all it has to offer. From wildlife, nature/adventure enthusiasts, hunters, farms, tourism, and its rich history! If this bill is passed, I fear for the future of our land & community. Wildlife habitat will be destroyed even further. There are already solar panel farms currently being put in place that take up acres upon acres of land. This is an area that needs to be kept free of pollution & environmental destruction as much as possible. My family has lived in Western Maryland for generations. It's crucial to preserve and keep pollution levels down for our environment & future of our community to continue to thrive & stay healthy. Please consider rejecting the proposal to allow fracking in Maryland. Thank you for taking the time to read my concerns.
