Please support SB929; establishing a workgroup to study the impact on persons with disabilities. I am hopeful that the work group will come up with a solution because this problem has gone on too long.

I cannot use the mail-in process because I have to get someone to show me where to sign the ballot and then I have to get it delivered to the Board of Elections. All of which is very difficult. I would like to use the mail in process because I am the caregiver for my father who lives in Puerto Rico. I never know when he will need me. He is 86 years old. Maryland should be making it easy for people to vote

Please vote in favor of SB929 and put an end to discrimination. Please make it possible for me to use the mail-in process so that I can care for my father.
