## **House Bill 741 Hunting - Nonlead Ammunition, Fox Chasing, and Deer Management**

Date: February 19, 2025  
To: Environment and Transportation Committee

Position: **FAVORABLE**  
From: Matt Stegman,  
MD Staff Attorney

---

Chesapeake Bay Foundation (CBF) **SUPPORTS** HB 741 which will, among other provisions, phase out the use of lead-based ammunition by hunters on or before July 1, 2029.

Lead (Pb) is toxic and is banned from gasoline, paints, and various household items in most developed countries. Lead ammunition, however, is still widely used for hunting and shooting, and is now likely the greatest, largely unregulated source of lead that is knowingly discharged into the environment in the United States.<sup>1</sup>

Scientists across North America and Europe have published consensus statements on the risks to wildlife, the environment, and human health from the use of lead ammunition and the need for its replacement by non-toxic alternatives. Lead has the potential to be bioaccumulated through the food chain to higher concentrations. In fact, the Center for Disease Control affirms that there is no safe level of lead for children.<sup>2</sup>

**CBF urges the Committee's FAVORABLE report on House Bill 741.**
