

Bill: HB0178

Bill Title: Vehicle Laws - Stopping, Standing, or Parking in a Bike Lane or Bicycle Path - Prohibition

Position: **Favorable**

Members of the House Environment and Transportation Committee,

HB0178 is a very simple, common sense bill with many precedents whose time has come. All across Maryland, for a host of reasons, municipalities are building bicycle infrastructure. In order for that infrastructure to be put to robust use by people riding bicycles, its purpose as a safe right-of-way for them needs to be respected. One aspect of accomplishing that is to make it clear that bike lanes and paths are not to be dangerously used as free or temporary parking for delivery and other non-emergency vehicles.

Maryland state law already puts this same protection in place for roadways, intersections, sidewalks, crosswalks, etc. The purpose - safety. Given that bicycle infrastructure is frequently placed adjacent to flowing automobile traffic, extending this protection to bike lanes and paths makes abundant sense. An automobile blocking a bike lane or path presents an unexpected and dangerous obstruction for bicyclists traveling at-speed. Furthermore, the obstruction may force the bicyclist into an adjacent vehicle travel lane mid-block - an unexpected and dangerous spot for a bicyclist to enter traffic.

Baltimore City, Washington, D.C., and the state of Virginia already have equivalent restrictions in place for their bicycle infrastructure.

This bill does nothing to impinge on the exemption provided to emergency vehicles - or directions provided by a police officer or traffic control device.

This is a no-cost, common sense measure that serves as another step toward encouraging active transportation and complete streets initiatives being pursued across the state.

We hope the committee finds these points helpful and convincing and we urge its members to **vote in favor of HB0178**. Thank you for your efforts and the opportunity for us to testify on this legislation.
