(Bloomberg) -- The Trump administration is working on a “market-based” plan to stem the closure of US coal-fired power plants as it seeks to supply more electricity before an expected boom in demand from artificial intelligence, Energy Secretary Chris Wright said.

Wright, who also serves as the vice-chair of the White House’s National Energy Dominance Council, declined to provide specifics of

President Donald Trump is expected to speak about the effort, Wright added.

“We’ve got to not only grow new production, but we’ve got to stop
