

## MARYLAND ORNITHOLOGICAL SOCIETY

February 12, 2025

Bill: <https://mgaleg.maryland.gov/2025RS/bills/hb/hb0400F.pdf>

### **Committees: Environment and Transportation**

### **Testimony on: HB0400—State Finance—Prohibited Appropriations—Magnetic Levitation Transportation System**

### **Position: Favorable HB0400**

The Maryland Ornithological Society (MOS) strongly supports HB0400 and urges the Committees to issue a favorable report. This bill would forbid the State and any of its units or instrumentalities from using any appropriation for a magnetic levitation transportation system (MAG-LEV), aside from salaries for personnel to assigned to review permits or other forms of approval for a MAG-LEV system.

MOS opposes the proposed Mag-Lev line between Washington, D.C. and Baltimore, because it would destroy several hundreds of acres of forest on the Beltsville Agricultural Research Center or Patuxent Research Refuge, part of last large undeveloped green spaces between the two cities.

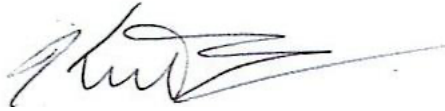

The proposed Mag-Lev line would do little to reduce road traffic between the cities, as the fares would be prohibitively expensive, and there would be only three stops. Funds will be better spent on improving existing rail corridors, which will benefit commuters, while preserving habitat.

We urge a favorable Committee Report from the Committee. North America has lost almost 30% of its birds since 1970.<sup>1</sup> Loss of habitat is one on the major causes of these declines. Mag-Lev will destroy acres of habitat, slice up the largest green space in Central Maryland, and do little to reduce traffic and associated air pollution. MOS asks the Committees to issue a favorable report on HB0400..

Sincerely,

---
