

Witness for HB 1451. 3/7/2025 4:30 pm

Dear Delegate Chisholm;

I am writing to testify that I strongly support your position in HB 145, and I am proud to call you my delegate.

I believe that our energy costs are entirely too high, and we must do whatever is humanly possible to bring them back to a manageable level. Though going solar, or green, is definitely a worthy endeavor for the environment, the current situation does not support putting it into practice for the time being. It is scandalous to have to buy energy from other states because we are shutting down some of our resources, and trying to fit that square peg into the round hole is going to continue to make citizens suffer.

Thank you for all you do!

Regards,

Laura A. Wiegmann
