

Dear House Environment and Transportation Committee,
In regards to SB722: Ecological Restoration Definition

As the President and Advocacy Chair of Prince Georges Audubon Society, located in Bowie Maryland, I speak for our over 400 members who would like to support SB722.

We thank the committee for advancing the companion bill HB 1155 through the House and **urge the committee to please move the Senate bill 722 without any additional amendments.**

It is important to wildlife and birding communities to have a clear definition of Ecological restoration to help preserve our wild and conservation areas here in the wonderful state of Maryland.

Thank you for your time and support of this Bill SB722/HB1155.

Lisa Bierer-Garrett, President Prince Georges Audubon Society
