

Delegate Bagnall has requested the following amendments for HB871 at the request of stakeholders in order to clarify what is being required under impact measurement.

Official language has not been received from DLS as of 2/24, but we will send to the Committee once we have it.

Amendment:

C(2)(IV)CRITERIA FOR EVALUATION AND IMPACT MEASUREMENT, including but not limited to:

- Number of people served through the MOU partnership and documented as receiving services from a CHW during a minimum of one visit
- Geographic focus areas as they align with the hospital's community health needs assessment prioritized service area;
- social determinants of health needs identified through social determinants of health needs assessment screening conducted by the hospital and addressed by CHW;
- and impacts on HSCRC preventable avoidable utilization (PAU) metrics as a result of the CHW intervention as reported by the parties. These metric areas include hospital readmissions, ambulatory care-sensitive admissions and preventable emergency department (ED) visits.
