

SB854
2025

Opposition Statement SB854 after Amendments
Health Occupations - Licensed Direct-Entry Midwives - Revisions
Deborah Brocato, Legislative Consultant
Maryland Right to Life

We Oppose SB854

On behalf of our 200,000 followers across the state, we respectfully object to SB854. Maryland Right to Life opposes this bill being used for abortion purposes and requests an amendment to prevent such purposes. There are several issues that put pregnant women and girls at risk. We object to psychological, socio-economic or physical assessments used for abortion coercion and referrals to abortion entities over referrals to other healthcare professionals who can address those issues. We object to this bill being used to force hospitals to provide or complete abortions initiated by a midwife who then chooses to transfer the woman or girl to a hospital. The Board allows midwives to "obtain and administer" misoprostol which is a drug also used for abortions. We strongly oppose midwives administering misoprostol to induce abortion and then transferring the woman to a hospital to force completion of the abortion.

ABORTION IS NOT MEDICALLY NECESSARY. Pregnancy is not a disease and 95% of biologists agree that a unique human life begins at the moment of fertilization. Abortion is not healthcare as evidenced by the fact that 85% of obstetricians and gynecologists in a national survey refuse to participate in abortion practices. Medical intervention necessary to save the life of the mother, including for ectopic pregnancy and miscarriage, is not prohibited by the law of this or any other state.

The state of Maryland has no legal obligation, nor moral authority to use public funds for abortion or to be a sponsor of the abortion industry.

The Supreme Court of the United States, in *Dobbs v. Jackson Women's Health* (June 24, 2022), overturned *Roe v. Wade* (1973) and held that there is no right to abortion found in the Constitution of the United States. As early as 1980 the Supreme Court affirmed in *Harris v. McRae*, that *Roe* had created **a limitation on government, not a government funding entitlement**. The Court ruled that the government may distinguish between abortion and other procedures in funding decisions -- noting that "*no other procedure involves the purposeful termination of a potential life*", and held that there is "*no limitation on the authority of a State to make a value judgment favoring childbirth over abortion, and to implement that judgment by the allocation of public funds.*"

Despite the fact that the Maryland General Assembly enacted a liberal abortion statute in 1991, the Maryland General Assembly moved to further promote abortion with the *Abortion Care Access Act* of 2022. Now, the removal of the physician requirement leaves women and girls with a higher risk of adverse events up to and including death at the hands of a "qualified provider," with unspecified

training from the state of Maryland. Because Medicaid and private health insurance are required to fully fund abortion, Maryland taxpayers pay for abortion.

ABORTION IS UNSAFE IN MARYLAND. Despite the Supreme Court ruling, abortion remains legal through all nine months of pregnancy and for any reason, under the *Maryland Freedom of Choice Act* (1991). The state of Maryland has repealed all criminal penalties and statutory restrictions on abortionists and abortion practices. Regulations on abortion clinics and practices are not routinely enforced. Physicians now serve only a tangential role on paper *if at all*, either as remote medical directors for abortion clinics or as remote prescribers of abortion pills.

As a result of these pernicious policies, the practice of abortion in Maryland has become the “red light district” of medicine, populated by dangerous, substandard providers. Through the *Abortion Care Access Act* of 2022, the state is depriving poor women access to care by a licensed physician. Through “telaboration” and the unregulated proliferation of “Do-It-Yourself” chemical abortion pills, the abortion industry itself has exposed women to “back alley” style abortions, where they bleed alone without medical supervision or assistance, then flush their babies down toilets. This is not progressive, but regressive.

MDH IS FAILING PREGNANT WOMEN AND FAMILIES. The Maryland Department of Health has consistently failed to meet the needs of pregnant women and families in Maryland and any appropriation should be withheld until the Department provides the annual report to the Centers for Disease Control to measure the number of abortions committed each year in Maryland, abortion reasons, funding sources and related health complications or injuries.

- The Department has routinely failed to enforce existing state health and safety regulations of abortion clinics, even after two women were near fatally injured in botched abortions.
- The Department has routinely failed to provide women with information and access to abortion alternatives, including the Maryland Safe Haven Program (Department of Human Services), affordable adoption programs or referral to quality prenatal care and family planning services that do not promote abortion.
- The Department has demonstrated systemic bias in favor of abortion providers, engaging in active partnerships with Planned Parenthood and other abortion organizations to develop and implement public programs, curriculum and training. In doing so the Department is failing to provide medically accurate information on pregnancy and abortion.
- The Department systemically discriminates against any reproductive health and educational providers who are unwilling to promote abortion and in doing so, suppresses pro-life speech and action in community-based programs and public education.

- The Department fails to collect, aggregate and report data about abortion and the correlation between abortion and maternal mortality, maternal injury, subsequent pre-term birth, miscarriage and infertility.
- The Department is failing to protect the Constitutionally-guaranteed rights of freedom of conscience and religion for health care workers, contributing to the scarcity of medical professions and personnel in Maryland.
- The Department is failing to protect women and girls from sexual abuse and sex trafficking by waiving annual reporting requirements for abortionists, waiving mandatory reporter requirements for abortionists, and failing to regulate abortion practices.

ABORTION IS LEADING KILLER OF BLACK LIVES. Abortion has reached epidemic proportions among people of color with half of all pregnancies of Black women ending in abortion. The Black population has long been targeted for elimination through sterilization and abortion. Even today, 78% of abortion clinics are located in minority communities. As a result, abortion has become the leading killer of Black lives. Abortion is the greatest human and civil rights abuse of our time and as a civilized people we cannot continue to justify or subsidize this genocide.

For these reasons, we respectfully urge you to amend SB854 to exclude abortion purposes. Women and girls can be pregnant and receive care for other conditions or situations by appropriate professionals. Hospitals should not be forced to complete abortions started by midwives or other “qualified providers.” Without an amendment to exclude abortion purposes, we request an unfavorable report on SB854.
