

Dear Health and Government
Operations Committee,

My name is Keira hearn
I am a student at Prince
Street Elementary I am writing
to you today why I think the
purple pitcher plant should be
Maryland's official carnivorous
plant. One reason
that I think the purple
pitcher plant should be Maryland's
official state plant is because
the purple pitcher plant
can eat insects that
damage things like gardens.
Another qualification I think it
has to be the state plant
is that it's native to Mary-
land. My last reason I
think the purple pitcher plant
should be Maryland's
official carnivorous plant is
because the evolve that it
had made it so it wouldn't
damage our valuable
Pollinators.
