

Dear, Health and Government Operations committee

My name is Hebe, and I am a 4th grade student at Prince street Elementary. And I am writing to you today because I want to talk about making the Purple Pitcher plant Maryland's official carnivorous plant, it should be the official plant because it is native to Maryland and it has a slippery and narrow surface preventing bugs from flying and crawling out so it keeps the environment bug free. I think that you can help by voting yes to making the Purple Pitcher plant our official plant. You will not regret because it will keep the environment pest free. Thank you very much for your attention to this issue. With your help I believe that we have an amazing plant, and I hope you will make the Purple Pitcher plant the official carnivorous plant.

Sincerely
Hebe
