

I strongly oppose HB1287 and ask the committee to return an unfavorable report.

It is already illegal to convert a firearm to fire "automatically".

The bill imposes yet one more unfair encumbrance on law abiding citizens who happen to own or carry a certain make/model handgun. This handgun is ubiquitous among the general population but also in Law enforcement.

The open ended nature of the handgun description can cause unintended consequences in the future by targeting unintended other brands or models.

Please return an unfavorable report on HB1287
