

learn from mistakes and not die from them. This is poison and it's being cut into all street drugs and fake pills are being made to mimic real pharmaceutical grade pills and no one can tell the difference. Accountability is key. Less than four months after my son was murdered, the dealer who sold him fentanyl but told him it was cocaine was arrested and charged with felony drug crimes for possession of 11.47g of marijuana, 36.34 grams of cocaine, 5.57grams of cocaine and fentanyl and 2.22 grams of heroin and fentanyl. All these drugs were packed for street sales. This guy was in possession of the same mixture that he had just killed my son with, he had zero regret for my son's loss of life! Fast forward to September of 2019, another four months after this, he himself became a victim of homicide in the Eastern District of Baltimore. He was shot to death. If he was incarcerated, he would have not been murdered on the streets of Baltimore and would have had a chance to change his behavior, without consequences there is zero reason to change! NOW HE'S DEAD AS WELL! IF PEOPLE WERE NOT DYING IT IS ILLIGAL TO SELL ILLICIT DRUGS!

All I ever wanted was to look the person that killed my son in the eyes and tell him what he took from me and my family and his friends. My life was flipped upside down and I've dedicated my life to saving others and warning the public! We need this bill to pass to save lives. The best harm reduction is getting poison peddlers off our streets. Our children deserve justice! Marylanders deserve justice and we have 0 justice right now. Hold people killing people responsible, my son was held responsible, he resides in an urn in my living room!

Sincerely,

April Babcock founder/President Lost Voices of Fentanyl
