

Testimony For HB0156

Honorable Delegates

Please vote for HB0156.

Students who are biological males should not be able to participate in traditional girls sports. They have physical advantages in height, strength, and lung capacity that girls do not have. They can run faster, jump higher, and swing, throw and spike harder. Because of these attributes, they pose a physical danger to the girls. They also take team positions that biological girls could have had. Finally, they make biological girls feel uncomfortable and unsafe in the locker rooms while showering and changing clothes.

Please vote for HB0115.
