

To whom it may concern,

I would like to provide written testimony in favor of bill HB156. I stand on the grounds of protecting our children and making sure they have a safe, fair and comfortable environment to enjoy sports and other activities.

I believe this bill will ensure that girls are safe and free to enjoy such activities and can have fair outcomes by only allowing biological females to participate.

As a woman and mother of daughters I have experienced situations with males in women's spaces and it is an unsettling and uncomfortable experience that puts biological females in a state of anxiety, uncertainty and fear.

Thank you for your time.
