to me

To Whom It May Concern,

I am a School Psychologist with Montgomery County Public Schools and recently learned more about the Lifesaver Schools Bill. I support the **Lifesaver Schools Bill** which is a no cost bill to support schools that provide mental health services to students in Maryland. Please strongly consider the passing of this bill during the 2025 Maryland General Assembly. I believe this bill will positively impact those in our field, and also others with similar mental health roles within the public schools, as we continue to support the students and families we work with.

Thank you for your time and consideration,
