

HB0156

Favorable

In your zeal to placate all genders (of which there are scientifically only two), forgotten are the 1 in 7 children who have experienced sexual abuse (source: FBI). When males are in female locker rooms this triggers these innocent children leading to lifelong health issues according to the CDC. Issues like depression, weight gain, unstable relationships and suicide. Please consider the innocent children caught up in this political nightmare.

It is time to follow your moral compass, no males in female sports, locker rooms and bathrooms.
