February 4, 2025

The Honorable Vanessa Atterbeary
Chair of the House Ways and Means Committee
6 Bladen Street, Room 131
Annapolis, Maryland 21401

House Bill 317

Good afternoon, Chair Atterbeary, Vice Chair Wilkins, and the members of the House Ways and Means Committee. I am Delegate Nicole Williams, and I will be testifying in favor of House Bill 317, also known as **Election Law - Curbside Voting - Pilot Program**. This bill is a pilot program to examine how curbside voting could take place here in Maryland by establishing the pilot in three locations across the state, one small, medium size and large jurisdiction during primary and general elections. These designated areas must be determined at least six months in advance and are subject to approval by the State Board. This would expand voting access for individuals with mobility limitations who still wish to vote in person.

Curbside voting currently exists in twenty-seven bi-partisan states, plus Washington D.C. Each election cycle, some individuals in Maryland are forced to overcome physical hardships to exercise their right to vote. Some may decide not to participate at all due to the struggle that in-person voting would cause them. While we do have vote by mail, ballots are not automatically mailed to each voter in the state, so if a voter fails to submit the request form, they have to physically go vote either during early voting or on election day. According to the Election Assistance Commission during the 2020 election, with the usage of absentee ballots, there was a 62% voter turnout amongst people with disabilities. Additional methods may increase the number of people with disabilities who vote in future elections. Data from the American Community Survey shows approximately 11% of people in Maryland (about 655,840 individuals) have a cognitive, hearing, vision, or ambulatory disability, which can impact their ability to contribute to the state vote.

Curbside voting is effective for individuals who are physically unable to go inside to vote. This bill helps people to vote comfortably without unnecessary stressors. This can also assist pregnant persons, elderly individuals, and those with life-threatening illnesses who do not

see going inside a crowded building or standing in long lines as a safe option for them. Passing this legislation would allow all individuals to exercise their right to vote in person and significantly contribute to the election outcomes. Other states allow this type of voting safely and securely.

All citizens of Maryland deserve the right to vote and we need to provide as many options as possible for our citizens to exercise this right. This bill will encourage all individuals to perform their civic duty.

For these reasons, I urge this committee to give a favorable report on House Bill 317.

Sincerely,

A handwritten signature in blue ink, appearing to read "Nicole Williams", with a long horizontal flourish extending to the right.

Delegate Nicole A. Williams, Esq.
