House Bill 35 – *Economic Development – Income Tax Benefit Transfer Program – Establishment*

**POSTION: SUPPORT**

The Maryland Tech Council (MTC), with over 800 members, is the State's largest association of technology companies. Our vision is to propel Maryland to be the country's number one innovation economy for life sciences and technology. MTC brings the State's life sciences and technology communities into a single, united organization that empowers members to achieve their goals through advocacy, networking, and education. On behalf of MTC, we submit this letter of support for House Bill 35.

House Bill 35 establishes the Income Tax Benefit Transfer Program within the Department of Commerce to allow eligible technology companies in the State with unused amounts of net operating loss subtraction modifications or income tax credits to transfer those benefits for use by other business taxpayers in the State. MTC understands that House Bill 35 is modeled after a similar law in New Jersey. New Jersey's program has demonstrated that such an initiative can provide much-needed capital to early-stage companies that have not achieved profitability by allowing them to sell their unused net operating losses to more established business entities. The proceeds from these sales provide liquidity to startups to continue to grow and innovate, hire skilled workers, and scale operations. Early-stage companies in Maryland would benefit from a similar approach to addressing the challenge of access to capital and high operating costs.

House Bill 35 helps move Maryland closer to our goal of becoming the country's number one innovation economy for life sciences and technology. We urge a **favorable** report.
