

HB 1180 – Right to Learn Act – Favorable

I am writing to support this bill that will ensure that all students who cannot or should not attend in person public schools be provided with alternative options.

There are times when some children, because of their violent or criminal actions, should not attend public schools in person because they could be a danger to themselves and others.

These children should be given options such as virtual schooling or in person tutoring in a controlled environment.

As we have seen from recent events in the State of Maryland, passing this bill will protect students and teachers from the acts of violent juveniles.

I support this bill.
